PROFESSIONAL SUMMARY

I am an experienced full stack developer with focus in cutting edge frontend design techniques. I leverage several design tools and frameworks in ensuring seamless and functional user interface. proven track record in developing and implementing software solutions to enhance customer satisfaction and team efficiency. Skilled in coordinating cross-departmental communications and leveraging technical expertise to streamline business processes.

WORK EXPERIENCE

Thunder Infotech Concept – Product Manager – 2021 till date

Thunder Infotech Concept delivers a suite of IT services including consulting, system supply, web development, and digital literacy training for individuals and businesses. As the product manager, I was responsible for overseeing the strategic direction, daily operations, and successful execution of all projects within the organization. I also led the development of internal systems and client solutions.

→ Spearheaded company formation and structured core service offerings around IT consulting, software development, and training.

→ Recruited, onboarded, and managed multidisciplinary teams including developers, trainers, and support staff.

→ Oversaw project execution using Agile methodologies, ensuring timely delivery of milestones and client satisfaction.

→ Personally led and supervised the development of proprietary software tools and systems for clients.

→ Maintained oversight of client acquisition, budget management, and strategic partnerships for business growth.

Aberdeen Commercial – IT Project Manager - *January 2023 – february, 2025*

Aberdeen Commercial provides a range of services including, technical, commercial and strategic advice across various industries. As an IT project manager and Lead for the IT department, I am responsible for planning and carrying out all projects related to the department. In carrying out software development projects we use several project management styles including Agile software development.

→ As an IT project manager I handled recruitment, onboarding and management of software developers for the eFCAS system.

→ engaged developers and managed milestone deliverables

→ Ensured all developers delivered source code and used standard approach to system development.

Aberdeen Commercial – Systems Analyst - November 2022

Aberdeen Commercial provides a range of services including, technical, commercial and strategic advice across various industries.

→ As an analyst I run through client systems and manage systems

→ I handled all user queries on the client systems also generated reports.

→ I also develop and update process manuals on client systems

Software Developer, Intel Box - December/2020 – May 2022 -, Abuja

IntelBox is tech start-up company, the company offers a variety of services, ranging from bootcamps to digital literacy programs.

→ I worked on an in-house web app. The app is an events management app, I used JavaScript, node, express and MySQL in developing the web app.

→ I also served as the project manager for the app development. Team collaboration apps like Jira, bitbucket and slack were used to manage the team.

→ I also served as a Tutor for kids programming and robotics bootcamp. I taught the kids coding using scratch a block-based programming language.

Front-end Developer, IT Central – July /2019 - 2020 - Kaduna, Nigeria

IT central is tech start-up in Kaduna, they provide tech solutions to schools and businesses.

→ I worked as a front-end designer for two projects, schoola and ledjar.

→ As a front-end developer I used html, bootstrap, CSS and JavaScript to create the pages.

→ I followed the designs created on figma by the UI/UX engineer to create these pages.

→ The project used python on the backend, I linked pages using python and also collaborated with the team using GitHub.
